

Women's Wellness Connection Program Reach:

Percent of uninsured women aged 40 to 64 and at or below 250% poverty served through WWC Clinical Services program between July 2014 through June 2015 (FY2014-2015)

For each county, percent served and total eligible population are indicated. Percent served includes WWC Clinical Services program and is total clients served divided by SAHIE county population estimate.

Sources: SAHIE 2014 (uninsured women aged 40 to 64 who were at or below 250% of the federal poverty level; Colorado Health Institute model for lawful presence estimates applied to SAHIE estimates), eCaST FY2014-2015 (women participating in WWC Clinical Services program, inclusion based on reimbursement in the fiscal year)

Fiscal Year 2014-2015 Women's Wellness Connection Program Reach: Count of women aged 40 to 64 receiving and estimate of women eligible to receive WWC Clinical Services by county and percent of poverty

ⁱ Census bureau Small Area Household Insurance Estimates (SAHIE) 2014 data were pulled for uninsured women ages 40 to 64 at or below 138% and 250% federal poverty level. Because SAHIE estimates do not distinguish between people who are and are not lawfully present in the United States and state law requires women to provide proof of lawful presence to receive WWC services, estimates from the Colorado Health Institute (CHI) of the women within demographic sub-populations of interest were removed from SAHIE county-level estimates. CHI's algorithm takes characteristics associated with undocumented status from a Pew Hispanic Center [report](#) and weights the likelihood that any given person in the Census American Community Survey data file is not lawfully present. Anyone with more than a fifty percent chance of being undocumented based on these characteristics (includes factors such as age, gender, citizenship status) are included in undocumented estimates.

ⁱⁱ Electronic Cancer Surveillance Tracking (eCaST) data including county of residence and percent of federal poverty level at time of program enrollment were pulled for women receiving WWC Clinical Services during Fiscal Year 2014-2015 (July 2014 through June 2015). "Women Served" refers to the unique count of women residing in a given county who received WWC Clinical Services.

ⁱⁱⁱ Percent of women eligible ("Eligible estimate") who received WWC Clinical Services ("Women served").

^{iv} For some small counties, the Census SAHIE estimate of uninsured women aged 40 to 64 was the same or lower than CHI's estimate of women who were not lawfully present. Estimate of eligible women has been reported as zero in these instances, regardless of whether or not a WWC agency reported serving a woman living in that county.
